FOR IMMEDIATE RELEASE

Maid Brigade Brings Revolutionary Cleaning System to Albuquerque

ALBUQUERQUE - June 10, 2020 - Maid Brigade, Albuquerque's premier green commercial and residential cleaning service, is doing its part to help prevent the spread of *Coronavirus* (COVID-19). Maid Brigade of Albuquerque announces the arrival of its revolutionary PUREmist® system for its customers. The innovative system kills germs, bacteria, and viruses on contact using an EPA registered hospital-grade disinfectant applied with an electrostatic sprayer. The combination creates an electronically charged mist that wraps around surfaces and objects for 360-degree coverage.

"A clean environment is the first step towards healthy living," said Maid Brigade Albuquerque owner Joanna Silva. "Flu germs can live on a surface, including a conference table, book, toy, remote or cell phone for hours or even days. The PUREmist® system kills the virus and germs on contact."

According to the most recent CDC findings, Coronavirus may remain viable for several days on a variety of surfaces. The PUREmist® system is a fast, affordable, cutting-edge solution for active offices and residences. The PUREmist® system is the same technology used by several U.S. airlines to disinfect commercial aircraft.

The preventative technology has a disinfectant bond to areas that are inaccessible to a traditional pump spray. Its ultra-fine mist eliminates the need to wipe away the remaining liquid after proper dwell time of just a few seconds has occurred.

"Maid Brigade can thoroughly and efficiently disinfect your home or workspace to help protect your customers, employees and family from COVID-19, cold and flu viruses along with other unwanted germs," said Silva. "It's the ultimate solution to keeping your business and home protected,"

Maid Brigade of Albuquerque is proud to be Green Clean Certified®. The company uses only green cleaning solutions and processes. The green cleaners never contain harmful toxins or carcinogens, which can promote health risks for people and pets. Maid Brigade always leaves your commercial space or residence clean and healthy by using specialized, concentrated cleaning solutions that are biodegradable and safe when mixed with water.

Family-owned and operated for over a decade, Maid Brigade of Albuquerque is bonded and insured. Their cleaning professionals arrive on-time and use only the finest supplies and equipment.
